Matching  
Cards!

Didactic and entertaining game.

The Memotrio game fully meets the motto of John Amos Comenius:

**School by Play – Schola Ludus!**

The principle of the game allows you to use different game levels for players of different ages.

The game can be played by the smallest children from 2-3 years, preschoolers, schoolchildren, teenager and adult players. Simple variants of the game are suitable for the seniors in advanced age.

Game cards may serve very well as appropriate educational tools.

### 1

## VARIANT FOR THE YOUNGEST PLAYERS MEMOTRIO QUIZ

### (VARIANT FOR THE BEGINNERS)

- The cards are spread on the playing surface.
- The players compose the correct trios in front of them.
- They use the graphic symbol to verify the matching cards.
- Each trio has its own identification symbol.
- The players have to give the trio the correct name.
- The players have to denominate the individual cards of each trio.
- The players have a task to describe the relation among the cards of the individual trios.
- The instruction sheet contains the correct solution.

The players have a task to group the trios that have something in common (trios of vowels and trios of consonants, trios of mammals, birds and fish etc.)

## 2

## MEMOTRIO – VARIANT FOR THE INTERMEDIATE PLAYERS

### MEMOTRIO SIMPLE BASIC

Before the start of the game, pairs are formed by selecting the third cards out. The cards are turned face down, players look for two cards that belong together. The graphical symbols serve again for verification.  
(Select out always the cards the same denominator/value);

Example:

**Animal families:** take away the cards representing the males

**Alphabet:** select out the cards representing the living creatures

**Mammals:** remove the card representing the food etc.

- Before the start of the game, select out several trios (3, 6, 9). The cards are turned face down, players look for three cards that belong together. By decreasing the number of trios you lower the difficulty level of the game.
- You can also diminish the number of pairs (mainly in Memotrio PLUS games).

Cards!

## MEMOTRIO – VARIANT FOR PRACTICALLY EVERYBODY

### MEMOTRIO PRACTIC – THE MAIN GAME

The cards are turned face down, players look for three cards that belong together. In the game, use all the cards contained in the set.

### MASTER VARIANT

After finding the whole trio, the player must complete the successful draw by naming the trio its correct name!

## MEMOTRIO – ADVANCED VARIANT

### MEMOTRIO STRATEGIC

The cards are turned face down, players look for three cards that belong together.  
In the game, use all the cards contained in the set.  
A player will get one point for the discovered trio.

**Premium points:** a player who discovers at least two trios with the same denominator (from the same category) gets 1 extra point for each trio:

#### Mammals

A player discovers two (three, four) trios of rodent (beasts of prey, insectivores)

#### Alphabet

A player discovers two (three, four) trios of vowels (consonants)

#### Trees

A player discovers two (three, four) trios of foliaceous trees (coniferous trees)

#### Countries and their symbols

A player discovers two (three, four) trios of countries of Europe (Asia, America).  
During the game, the players must assign the trios precisely to the correct categories.

### LOTTO-TRIO

Use a poster with template and card triades with pictures matching the template.  
Players paste matching cards on the preprinted template.  
During the game players try to name every card and specify names of whole triades.

Several game variations:

-  The cards are placed on a table face up and players paste the cards in any desired order.
-  The cards are spread out on a table upside down. Players turn the cards one by one and seek for other needed cards according to triades on the poster.
-  The cards are stacked in a pile (column). Players take away cards singly and they have to paste them on right place in order.

### LOTTO-TRIO

#### ADDITIONAL GAME FOR THE YOUNGEST CHILDREN

Use the same poster as in the previous variants. Fold it to use only the left column, which features only the first card from each trio. Players try to compose the trios trying to find the remaining two cards, to follow the first card **WITHOUT** the aid of the printed images.

Several game variations:

- The cards are placed on a table face up and players paste the cards in any desired order.
- The cards are spread out on a table upside down. Players turn the cards one by one and seek for other needed cards according to triads on the poster.
